

HYDRO-LITE

AZTEC HYDROSTATIC TEST PUMP

Test pumps are a staple in the petrochemical, pipe welding, and testing industries. With Aztec's HYDRO-LITE, safety is our number one concern. That's why ours is built using the highest quality of components and is built here in the US.

Our developers have over 70 years of combined experience in the refinery/petrochemical industry. We understand the needs of our customers and have strived to make HYDRO-LITE one of the lightest pumps on the market without cutting the quality. We deliver the reliability and dependability you expect and deserve when pressure testing pipes and vessels. Our pump is tested before departure from our facility to ensure it meets our rigid quality control specifications.
